

## Sparkling Water Service

Pellegrino sparkling water is available in two sizes. 500ml (16.9 oz.) and 1000ml (33.8 oz.).

An individual guest that orders sparkling water should be served a 500ml bottle unless a large bottle is requested.

If two or more guests request sparkling water you should suggest a 1000ml bottle to be shared.

If an individual guest drinks a small bottle quickly you should suggest a large bottle for the second service.

Bring an empty 12 oz. highball glass to each guest who orders sparkling water. Pour the water in front of the guest. Our water is served chilled so only serve ice if requested. Place bottle with any remaining water on the table in a bottle chiller within reach of the guests that are drinking it.

Make sure that you get some sort of acknowledgement from a guest before you replace empty sparkling water with full bottles. One of the most common forms of “up-stealing” is serving

Fruit – Sparkling water is served with wedges of fresh lemon and lime. Serve one wedge of lemon and one wedge of lime for each guest. Wedges are to be placed in front of the guest(s) in a white ramekin. Do not try to fit more than three wedges of each in the ramekin. Use multiple ramekins for large parties.
